

Trader's Edge Developer Handoff

Discipline Scoring Logic + Core Product Intelligence

Product Principle

Trader's Edge does not score trading results.

Do not score:

- P&L
- Win rate
- Trade count
- Account balance
- Market direction
- Broker performance

Trader's Edge scores trader behavior:

- Discipline
- Risk control
- Emotional control
- Mission adherence
- Self-awareness

The score must feel fair, explainable, and based only on user-provided data.

Discipline Score

Total score: 100 points

Categories:

1. Execution Integrity — 20 pts
 2. Risk Discipline — 20 pts
 3. Emotional Control — 20 pts
 4. Mission Adherence — 20 pts
 5. Self-Awareness — 20 pts
-

1. Execution Integrity

Question:

Did you follow your trading plan?

Scoring:

Yes = 20

Mostly = 10

No = 0

Rule:

If answer = No, max final grade cannot exceed B.

2. Risk Discipline

Questions:

Did you respect your stop loss?

Did you stop when you should have?

Scoring:

Yes + Yes = 20

Yes + Mostly = 15

Mostly + Mostly = 10

Any No = 5

No + No = 0

3. Emotional Control

Inputs:

Did you avoid FOMO?

Did you avoid revenge trading?

Emotional control slider

Scoring:

Avoided FOMO:

Yes = 8

Mostly = 4

No = 0

Avoided Revenge Trading:

Yes = 8

Mostly = 4

No = 0

Emotional Slider:

80-100 = 4

60-79 = 3

40-59 = 2

20-39 = 1

0-19 = 0

Total max = 20

4. Mission Adherence

Based on selected Mission Setup:

- Objective
- Threats
- Core Focus

Base scoring:

Followed Plan = 10

Avoided Primary Threat = 5

Stayed aligned with Core Focus = 5

Example:

Objective: Protect Capital

Threat: FOMO

Core Focus: Patience

If user followed plan, avoided FOMO, and stayed patient:

Mission Adherence = 20

5. Self-Awareness

Reward reflection.

Scoring:

Completed Debrief = 5

Entered Biggest Lesson Today = 5

Selected Emotional State = 5

Completed Self-Assessment = 5

Total max = 20

Grade System

95-100 = S

90-94 = A+

85-89 = A

80-84 = A-

75-79 = B+

70-74 = B

60-69 = C

Below 60 = Recovery Required

Do not use D or F.

No Trade Day Logic

If user selects:

Did you trade today? = No

Use No Trade Debrief questions:

Did you avoid forcing trades?

Did you remain patient?

Did you protect capital?

Did you follow your mission objective?

Scoring:

Yes = full credit

Mostly = half credit

No = zero credit

Important rule:

If user did not trade and answered Yes to:

- Avoided forcing trades
- Protected capital
- Remained patient

Then minimum Discipline Score = 90.

Purpose:

Trader's Edge rewards discipline, not activity.

Mission Status Logic

Used for Mission Active, Lock Screen, and Nook.

Inputs:

- Confidence
- Patience
- Focus

Values:

Low = 30

Medium = 65

High = 90

Display as Low / Medium / High, not percentages.

Status Rules

ON TRACK:

Confidence $\geq$ Medium
Patience $\geq$ Medium
Focus $\geq$ Medium

CAUTION:

Any one metric = Low

HIGH RISK:

Two or more metrics = Low

LOCKED IN:

Confidence = High
Patience = High
Focus = High
For 2 consecutive check-ins

Behavioral Classification Logic

Generated from recent mission history.

Use last 30 completed missions.

Examples:

Capital Preserver:

Risk Discipline average $\geq$ 90

Patience Specialist:

Avoided FOMO score $\geq$ 90

Discipline First Trader:

Overall Discipline Score average $\geq$ 85

Consistency Builder:

Current streak $\geq$ 14 days

Risk Controller:

Risk Discipline is user's highest scoring category

Execution Focused:

Execution Integrity average ≥ 90

Rank Progression

Ranks:

Recruit
Operator
Senior Operator
Elite Operator
Special Agent
Director

Suggested thresholds:

Recruit: 0-59 average score
Operator: 60-74
Senior Operator: 75-84
Elite Operator: 85-94
Special Agent: 95+ with 10+ completed missions
Director: 95+ with 30+ completed missions and 21+ day streak

Rank progression should use:

- Average Discipline Score
 - Completed Missions
 - Current Streak
-

Data Sources

Every score or insight must come from:

- Mission Setup
- Pre-session Readiness Check
- Mid-session Check-ins
- Mission Debrief

- Session Notes
- Mission Complete Event

Do not invent intelligence.

Do not imply broker integrations.

Do not claim the app detected trading behavior automatically.

Product Rule

If a piece of data cannot be traced to user input or mission activity, do not display it.

Trader's Edge must feel credible, not fake-smart.
