

Trader's Edge Developer Handoff

Intelligence Systems

1. Rank Progression System

Purpose

Ranks give users a sense of growth without tying progress to money.

Rank should be based on:

- Average Discipline Score
- Completed Missions
- Current Streak

Do not use:

- Profit
 - P&L
 - Win rate
 - Trade count
-

Rank Levels

Recruit

Requirements:

- Average Score: 0-59

Operator

Requirements:

- Average Score: 60-74
- Completed Missions: 3+

Senior Operator

Requirements:

- Average Score: 75-84
- Completed Missions: 7+

Elite Operator

Requirements:

- Average Score: 85-94
- Completed Missions: 14+

Special Agent

Requirements:

- Average Score: 95+
- Completed Missions: 10+
- Current Streak: 5+

Director

Requirements:

- Average Score: 95+
- Completed Missions: 30+
- Current Streak: 21+

Rank Progress Calculation

Use progress toward next rank.

Example:

Current Rank: Elite Operator

Next Rank: Special Agent

User has:

- Average Score: 92
- Completed Missions: 28
- Streak: 14

Needs:

- Average Score: 95

Display:

Next Rank: Special Agent

3 Strong Sessions Remaining

2. Behavioral Classification Logic

Purpose

Classification tells the user what type of trader they are becoming.

Generated from the last 30 completed missions.

Classifications

Discipline First Trader

Condition:

- Average Discipline Score ≥ 85
- Mission Completion Rate $\geq 80\%$

Capital Preserver

Condition:

- Risk Discipline average ≥ 90

Patience Specialist

Condition:

- Avoided FOMO average ≥ 90

Risk Controller

Condition:

- Risk Discipline is highest scoring category

Execution Focused

Condition:

- Execution Integrity average ≥ 90

Consistency Builder

Condition:

- Current streak ≥ 14 days

Recovery Operator

Condition:

- Last 5 mission scores improved by 10+ points total

Caution Profile

Condition:

- Average Discipline Score < 70
 - FOMO or Revenge Trading appears 5+ times in last 10 missions
-

Priority Order

If multiple classifications apply, assign based on priority:

1. Discipline First Trader
 2. Capital Preserver
 3. Patience Specialist
 4. Risk Controller
 5. Execution Focused
 6. Consistency Builder
 7. Recovery Operator
 8. Caution Profile
-

3. Mission Status Logic

Purpose

Mission Status powers:

- Mission Active screen
 - Lock Screen Live Activity
 - Nook / Dynamic Island
 - Notifications
-

Inputs

From readiness and mindset check-ins:

Confidence: Low / Medium / High

Patience: Low / Medium / High

Focus: Low / Medium / High

Internal values:

Low = 30

Medium = 65

High = 90

Status Rules

ON TRACK

Condition:

- Confidence $\geq$ Medium
- Patience $\geq$ Medium
- Focus $\geq$ Medium

Display:

 ON TRACK

CAUTION

Condition:

- Any one metric is Low

Example:

- Patience = Low

Display:

 CAUTION

Message: Patience declining. Review your mission.

HIGH RISK

Condition:

- Two or more metrics are Low

Example:

- Patience = Low
- Focus = Low

Display:

 HIGH RISK

Message: Slow down. Protect capital.

LOCKED IN

Condition:

- Confidence = High
- Patience = High
- Focus = High
- For 2 consecutive check-ins

Display:

 LOCKED IN

Message: Patience maintained. Mission on track.

4. Notification Engine

Notification Types

Mission Start

Trigger:

- Selected session start time

Example: Mission Briefing: NY Session
Protect capital first. Wait for your setup.

Mid-Session Check-In

Trigger:

- Every 60 minutes during active session

Example: Mission Check-In Due
How are you feeling?

Action: Open Update Mindset

Behavioral Alert

Trigger:

- Mission Status changes to CAUTION or HIGH RISK

Example: Caution
Patience is declining. Wait for confirmation.

High Risk
Slow down. The next trade is not required.

Positive Reinforcement

Trigger:

- Mission Status changes to LOCKED IN

Example: Locked In

Patience maintained. Keep executing.

Mission Complete Reminder

Trigger:

- Session end time

Example: NY Session Complete

Tap to complete your debrief.

Debrief Reminder

Trigger:

- 30 minutes after session end if no debrief completed

Example: Complete Your Debrief

Turn today's session into intelligence.

Weekly Intelligence Report

Trigger:

- Sunday evening

Example: Weekly Intelligence Ready

Your biggest leak this week was FOMO.

5. Data Architecture

User

```

"quietHoursEnabled": true,  
"quietStart": "18:00",  
"quietEnd": "07:00"  
}
```

Product Rule

If the app cannot trace a score, status, classification, or report back to user input or mission activity, do not display it.

Trader's Edge should feel intelligent, but never fake.
