Trader's Edge

Product Requirements Document (PRD)

Version: 1.0

Status: MVP Definition

Owner: Torez Mitchell

Product Vision

Trader's Edge is a discipline operating system designed specifically for traders.

Most trading tools focus on charts, indicators, and performance metrics.

Trader's Edge focuses on behavior.

The goal is to help traders:

- Protect capital
- Follow their plan
- Reduce emotional decision making
- Improve consistency
- Build professional trading habits

Trader's Edge does not provide trade signals.

Trader's Edge does not execute trades.

Trader's Edge does not attempt to predict markets.

Trader's Edge exists to improve trader discipline.

Problem Statement

Most traders know what they should do.

They struggle to actually do it.

Common behavioral issues include:

- FOMO
- Revenge trading
- Overtrading
- Entering early
- Ignoring stop losses
- Deviating from trading plans

Existing journaling tools focus heavily on P&L and trade analytics.

Few tools actively support discipline during the trading session itself.

Trader's Edge fills that gap.

Target Audience

Primary Users

Retail traders

Examples:

- Futures traders
- Forex traders
- Options traders
- Prop firm traders

Experience Level:

- Beginner
 - Intermediate
 - Advanced
-

Core Product Promise

Every trading day begins with a mission.

Every trading session is monitored through discipline.

Every trading day ends with reflection.

Every completed session improves trader intelligence.

Core User Flow

Mission Setup → Readiness Check → Mission Active → Mid-Session Check-In → Mission Complete → Debrief
→ Discipline Score → Progress Tracking → Vault Intelligence

MVP Features

Mission Setup

Users select:

- Objective
- Threats
- Core Focus
- Session

Examples:

Objective:

- Protect Capital

Threat:

- FOMO

Focus:

- Patience
-

Readiness Check

Before trading:

User rates:

- Confidence

- Patience
- Focus

Values:

- Low
- Medium
- High

Results feed Mission Status logic.

Mission Active

Active trading companion.

Displays:

- Objective
- Threats
- Focus
- Session Timer
- Mission Status

Mission statuses:

- On Track
 - Caution
 - High Risk
 - Locked In
-

Lock Screen Briefings

Live Activity support.

Displays:

- Mission briefing
 - Focus
 - Status
 - Session information
-

Dynamic Island / Nook

Displays:

- Mission status
 - Focus
 - Alerts
 - Session updates
-

Mission Debrief

After trading:

User records:

- Plan adherence
 - Stop loss discipline
 - Emotional control
 - FOMO avoidance
 - Exit reason
 - Biggest lesson
-

Discipline Engine

Generates:

- Discipline Score
 - Grade
 - Session Classification
-

Progress Center

Displays:

- Discipline trend
 - Streaks
 - Rank progression
 - Threat analysis
 - Strength analysis
-

Vault

Stores:

- Mission reports
 - Session notes
 - Intelligence reports
 - Historical insights
-

Profile

Displays:

- Callsign
 - Rank
 - Classification
 - Success metrics
 - Protocol settings
-

Non-Goals

The MVP will not include:

- Broker integrations
 - Trade execution
 - P&L tracking
 - Win rate tracking
 - Social features
 - Leaderboards
 - AI trade analysis
-

Success Metrics

Product Metrics:

- Missions Started
- Missions Completed
- Debriefs Completed
- Weekly Active Users
- User Retention

Business Metrics:

- Free to Pro Conversion
 - Monthly Revenue
 - Annual Revenue
 - Subscription Retention
-

Product Principle

Every piece of intelligence shown to the user must be traceable to real user behavior.

Trader's Edge should feel intelligent.

Never fake.
